The KNORR SK7 brake calliper is used in many 22.5" gigant axles with disc brakes for semitrailers, central-axle trailers and drawbar trailers:

Axle type	Tonnage	Wheel connection	Possible tyres	Description*
Rigid axle	9t	ET 0 / LK \varnothing 355 / \varnothing 280.8	385/65 R22.5	DKH2 09010 4345K
Rigid axle	9t	ET 120 / LK \varnothing 355 / \varnothing 280.8	385/65 R22.5	DOKH2 09010 4345K
Rigid axle	10.5t	ET 0 / LK \varnothing 355 / \varnothing 280.8	425/65 R22.5	D(E)KH2 10510 4345K
Self-steering axle	10.5t	ET 0 / LK \varnothing 355 / \varnothing 280.8	385/65 R22.5	DNKH2 10510 4345K
Steering axle	10t	ET 120 / LK \varnothing 355 / \varnothing 280.8	385/65 R22.5	D(E)ZOKH2 10010 4345K

* Other variations will be available after market introduction! Please contact the gigant sales team.

Please note:

With the introduction of the KNORR SK7 brake calliper, the approval documents may need to be updated. Test report 361-037-13 applies for the brake

The test report can be downloaded from the gigant homepage effective immediately: <https://www.gigant-group.com/service/pruefprotokolle/> or requested from homologation@gigant-group.com.

You will find the associated wear parts in the gigant spare parts catalogue under: <https://www.gigant-parts.com/>

The gigant team is happy to answer any questions you may have and wishes you a safe journey.
